WALL STREET TOPICS.

THE chief topics in financial circles are the continued ease in money, the rise in government securities, and the general revival of confidence in the face of the probability of the contraction policy being thoroughly approved and acted on by Congress. There has also been some interest awakened by the statement that a five per cent perpetual loan was being urged at Washington as a means of funding the temporary obligations and floating debt of the Treasury. When, however, the proposers of this loan confess that it would require an issue of 50 or 100 millions of greenbacks to "float" it, they have said enough to kill the project. The country saw the effects of the "floating of loans" after the withdrawal of the first Five-twenty loan in 1863, when the Treasury made the experiment of diluting the currency to float the Ten-forties, and failed. The results of that financial

effectually prevent Congress from approving, or the Secretary of the Treasury from suggesting any such dangerous expedient.

So long as our six per cent gold bearing bonds are selling at par, and our five per cents with interest on, at 911, it is mere trifling to talk of negotiating a five per cent bond at par. We must, therefore, be content for the present to fund our floating debt in six per cents and these funding bonds, being redeemable in a few years at the option of the government, can be replaced by bonds bearing a lower rate of interest as soon as the inevitable rise of the public credit shall justify the change.

Some regret has been expressed that Mr. McCulloch's report contains no recommendation for the issue of certificates of indebtedness. These securities are very popular and very scarce. They could be sold on as good terms as the seventhirties. And, without any injury to other interests, the Treasury might permanently borrow by successive issues of this description of Government paper 100 millions of dollars. Such a resource could scarcely fail to be of considerable public advantage in the present and prospective state of our finances; and it is obviously desirable to strengthen the Treasury as much as possible.

The only other topic claiming special notice in this place is the general dissatisfaction at the non-appearance of the report of the three gentlemen appointed by Mr. McCulloch last June to serve on the Tax Inquiry Commission authorized at the last session of Congress. The benefits of the investigations of this Special Commission will be very much diminished, except the report be printed and put in circulation early during the session. We have had too much of hurried hasty tax legislation. Its mischievous consequences are too serious for us to wish a repetition. The members of Copgress and the public will desire to examine, with the most scrupulous care, every proposed change in the Internal Revenue law. The report, by all means, should be forthcoming early in January.

CONGRESS AND THE PUBLIC DEBT.

Our disbursements, on account of the National Debt, have been rather heavy of late. Yesterday almost eleven millions of interest fell due on the second series of Seven-thirty notes; one month hence 81 millions will be paid on the third series; and on the 1st January ten millions of gold interest has to be met for our long bonds. These payments with the maturing obligations of the Treasury, make up for 60 days an aggregate of forty millions of disbursements for effort will long live in the memory of the people and will principal and interest of the public debt. So ample, how

or for ad,

ith

ith

ever, have been the receipts from taxes and from other income that Mr. McCulloch will have no difficulty in meeting all these claims as they mature.

A more satisfactory proof of the exhaustless resources of this country, or of the general good management of the public Treasury it is impossible to imagine than the promptness and certainty with which the payments of the past 18 months have been met. The sum required during that section of the war period is so vast, that on looking back we wonder how it has ever been raised, and the financiers of other countries are still more at a loss to explain the mystery. During the year ending 30th June last Mr. McCulloch reports his receipts as follows: From loans applicable to expenditures \$864,863,499, from loans applied to payments of public debt \$607,361,241, aggregate of loans \$1,472 224,740. From taxes and miscellaneous sources he reports \$329,567,-886. During the year, therefore, we raised by loans and taxes no less than 1,800 millions of dollars. The chief cause for anxiety about this statement was the small amount raised by taxes as compared with the loans. This difficulty, however, arose from the newness of our tax-machinery which we are getting into better working order, as is shewn by the statement for the three months ending 30th September last. The receipts for this period were 277 millions from loans; but the taxes yielded 162 millions, or half as much as for the preceeding year. During the fifteen months covered by these figures, our people raised for all purposes and paid into the Government Treasury the prodigious sum of 2,250 millions of dollars, and this, although in the earlier part of the time we were straining our energies to the utmost, and impairing our productive powers by sending recruits to keep up the ranks of the army.

Forgetful of these financial achievements some of us are now desponding, and prophesy all sorts of evil to our National finances, because during the next three years we have 1,100 millions of short obligations to fund into long bonds. If the past has any lessons for us, we ought rather to conclude that were the sum to be funded three thousand millions instead of one thousand, it could be done in the three years with

It is also worthy of remark, that the receipts of the Treasury during the last year of the war were raised without any increase or inflation of the currency. When Mr. Chase resigned in June, 1864, the efficient paper money of the country was greater than it is now. We have positively con tracted our active currency and we have still contrived to raise among ourselves, without a foreign loan, and without crippling our domestic industry, all the funds we required for the protection of the National credit and for the vindication of the National honor.

But what, it has been asked, is the nature of these resources from which we have drawn our stupendous disbursements during the past four years? It is in vain to point to our unexplored mines, our railroads, our unoccupied lands; these we have still: nor to our busy manufactories, our rich farms, our commercial cities; these abound among us in greater profusion than before the war. We have not destroyed these forms of our stored-up internal wealth. Every thing in our industrial and commercial position proves that whatever else we have spent on our army and navy we have not diminished our capital. That is greater now than when we entered on the struggle. Much as we have paid out, we have made more. Our National income has evidently far exceeded our National expenses. We are like a rich farmer who has had a costly lawsuit, or a disastrous fire; but finds at the year's end that his income has been greater than his losses and that his available capital has increased in spite of his misfortunes.

But although our resources are so large, it is of the last importance that they be judiciously economized. Our taxes are probably capable of being made twice as productive without pressing half as heavily on the people. The process of funding must be adjusted to the financial situation of the country. Rigid economy must be enforced in every department of the government. We must remove as fast as possible such governmental restrictions as fetter the movements of industry, check the activity of production, or hinder that growth in the masses of the people of intelligence, moral worth, skill and enterprise, which, while they are among the most precious ingredients of National wealth, are also the firmest bulwarks of the public credit.

Such, then, is the fiscal problem which the present Congress have to solve. Their task is to devise measures to fund the debt, to restore the currency, to adjust the pressure of taxation, and to do all this so that the wealth, the morals, the industrial growth and the commercial ascendancy of the country may suffer as little as possible.

THE TREASURY AND THE COMPOUND NOTES.

"A government would do more wisely," it has been said, "not to enter on a new and better policy than having adopted that policy to renounce and reverse it." If this is true in other Departments, it is emphatically true in the administration of the Treasury.

It is not, therefore, without regret that we hear rumors that some change of policy is pending as to the compound interest legal tender notes, and that orders were issued a few days ago by Mr. McCulloch requiring the Assistant Treasurers and Depositories of the public money to send to Washington, and not to pay out to the public, the compound notes which are received daily in payment of taxes and other dues, whatever be the dates of such notes. This statement, taken in connection with several passages in Mr. McCulloch's recent report, is supposed to indicate that he is anxious to withdraw the compound notes from circulation, and will pay out no more of them than he can help.

So complete and so pervading is the power wielded by the Treasury over the financial system of the country that every new order, with its probable effects and indications of future policy, is earnestly canvassed among our business men; and it is claimed by some persons that this policy of calling in and cancelling the compound legal tenders offers at first sight some promise of advantage. This opinion cannot be gainsaid. There is, for instance, a saving of accrued interest by the Government if the notes are received at par; and already more than one million of dollars are reported to have been economised in this way. Secondly, the next monthly returns of the debt will thus be made to show a diminution in the aggregate of the Government currency; and this, in the present temper of the public mind, may contribute in some degree to pacify the desire and quiet the clamor for contraction. Lastly, this contraction, if confined to the compound interest notes, would produce but little derangement of the loan market; for, although they are legal tenders, still being interest-bearing also, they are held for investment. Consequently their movements as money are slow, and their removal from the channels of this circulation produces less disturbance in the loan market than would a much smaller abstraction of ordinary legal tenders. These reasons are weighty and well worthy of consideration. The time will come when, without deviating from the most conservative policy, the compound notes can be gradually withdrawn and cancelled with safety for ever.

But it is easy to see that such an attempt, in the present state of the Treasury, is premature; and that an ill-advised contraction now will lead only to further expansion here5.

after. Mr. McCulloch cannot contract the volume of the Government currency until he has first prepared the way by paying off the call loans. With eighty-nine millions of debt liable to be demanded at ten days notice or less, it is in vain to talk of contraction. These demand-loans did good service during the war, but, like some other war measures, are now equally mischievous and unnecessary. Not only do they tend to expansion, but they effectually check all our attempts to correct the evil by bringing back a healthier state of the currency. The inflationists and speculators of Wall street laugh at all Mr. McCulloch's laboring efforts and cheerful promises to lessen the volume of the currency, so long as these demand-loans oppose his policy and baffle his efforts. They know very well that the real work of contraction resolves itself into the paying off of the call-loans first; and then getting a further surplus of available income, either from taxes or from loans. To attempt to contract the volume of the currency by any other means is to court disappointment, and to risk evils which are even worse.

But we have another objection to offer to the plan of suppressing the compound interest notes. They are the least mischievous of all our legal tender issues. By reference to the table of the national debt on page 742 of our last number it will be seen that the government currency amounted to 626 millions, of which 426 millions were greenbacks, 169 millions compound notes, and 32 millions 5 per cent one and two year legal tenders.

The last named notes have been very inflating and unpopular, and are now virtually withdrawn from circulation. Most of them matured on the 1st inst. The remainder are held like other interest-bearing paper till maturity. The government currency, therefore, consists only of greenbacks and compound notes; the latter forming less than one-third, and the former two-thirds of the whole mass. Now, the point we insist upon is that the compound notes do not derange the currency much, and subserve better the policy of contraction than any other legal tenders that have ever been issued. This is a matter of great practical importance, for it shows that these compound notes can with advantage take the place of the greenbacks as a first step towards the ultimate funding of the whole mass of that species of Government paper money.

Their great superiority, therefore, over other legal tenders is that they form an indispensable part of the best practical method we have seen proffered for the effective resumption of specie payments. This plan consists of three successive steps. First, we must pay off the whole of our temporary loan: except, perhaps, 20 or 25 millions of Clearing House certificates which may for the present be left with convenience to the Government and advantage to the people. Secondly, we must gradually convert the entire mass of greenbacks into compound interest notes. This conversion should be slow and will easily be accomplished by making the substitution as the notes are paid into the National Treasury. Thirdly, the older notes should be made fundable into bonds at par and interest, the bonds being offered on such terms as will meet the exigencies of the market. To the success of this scheme it is essential that the older notes alone should be thus funded, and that those of recent dates should be allowed to move with a gradually retarding activity in the

These views, it will be seen, are in direct opposition to the opinion of those who class the compound notes with those short obligations of the Treasury that embarrass its move ments towards specie payments. The only short obligations of the Treasury which do this at present are the call loans. These being paid off, the chief embarrassment would cease till the seven-thirties begin to mature; and these notes can

be provided for if the government credit rests on the stable broad basis of economical administration, sound currency, enlightened taxation, and industrial prosperity. But no measures, perhaps, would shake these foundations of our national credit so profoundly as ill-considered and ill-sustained attempts at contraction.

THE DEMAND UPON ENGLAND.

THAT is by no means the least interesting or the least admirable part of the Message of President Johnson which relates to the demand made by the United States upon the government of Great Britain, for compensation to our citizens who have suffered losses at sea through the depredations of the rebel privateers fitted out in British ports.

The President states the case as it now stands between the two countries with remarkable clearness and force: and it is important that the people of the United States should understand, with the President, and as wisely as he, just what we have asked of Great Britain, and what she has refused. It was by no means the primary object of the American Government to collect a certain sum of money for the indemnification of our injured citizens. Such an object would not indeed have been unworthy the attention of any government, however great and powerful, but the point really aimed at by the United States was a much greater and loftier one. We desired, as President Johnson expresses it, to have the subject considered by Great Britain " as involving questions of public law, of which the settlement is essential to the peace of nations."

To limit the operations of every war, as far as may be, to the exact scope of the resources of the powers or parties actually and formally waging the war, is a matter of greater importance now than ever before, to every civilized nation. With the enormous increase of commerce in modern times, almost every State in Christendom is now liable to be compromised by the base and reckless among its subjects in any hostilities which may arise between important naval powers; and the "duties of neutrals," of which our demands upon England were designed to bring about a better and more positive definition, are duties now not to the belligerent powers of this or that war alone, but to the whole family of nations. Whether the owners of the ships burned and bonded by the Alabama and her consorts shall or shall not be reimbursed, for the losses by the British Exchequer, is a question which, in all its most important bearings, really and ultimately concerns every shipowner in England and in Europe, quite as much as it concerns the government and people of the United States.

Great Britain summarily declines to entertain this question at all, and on the ground, to use again the forcible words of President Johnson, that "the municipal law of a nation, and the domestic interpretations of that law are the measure of its duty as a neutral." This is a very accurate statement of the position taken up by Earl Russell in his correspondence with Mr. Adams, and it is a little surprising, we think, that Mr. Adams, instead of contenting himself as President Johnson very wisely does, with protesting against this position as involving a profound misconception of the nature and objects of international law, should have entered into arguments to show that, judged by this measure of her own selection, Great Britain will have fallen short of her obligations. Were this established it would have no practical bearing upon the case as we present it. It is no affair of ours to prove to England either the adequacy of her domestic legislation, or the inadequacy of her municipal administration. As we stated in a former article (Chronicle of Oct. 28) on this same subject, we cannot urge the failure to execute her own statutes, her own merely municipal law, as a ground for British liability, when it is not pretended that any treaty exists requiring its

But, if the acts complained of were a violation execution. of the law of nations, then, we insist, that she is liable; for there is, and can be, no nation in Christendom in whose government does not inhere the power and the duty, irrespective of its municipal law, of preventing and punishing such violation. What we seek, then, from Great Britain is a distinct recognition of, or a distinct refusal to recog nize the obligation of a neutral power to protect the rights and interests of belligerent States against such invasion and injury by the subjects of the neutral, as it is patent and notorious that the shipping of the United States suffered at the hands of British subjects during the late war. Allegations of British "sympathy" with the insurgents, or of the laxity of the British police service are unfortunate and worse than superfluous in any discussion of this demand. It should be pressed simply and purely, without heat and without passion, as a point of international law which is of paramount consequence, not to the United States alone, but to all nations.

It is to the credit of President Johnson that he does so press it in his Message; and it is not to the credit of British statesmanship that it should have been received and dealt with, in the Foreign Office of Great Britain, almost in the temper in which a testy country gentleman might discuss what he regarded as a vexatious claim for damages urged by an ill-conditioned and grasping neighbor.

It is possible that a change in the British Ministry may, ere long, put into the Foreign Office some statesman capable of grasping the real merits of this question, and of bringing it to a settlement which shall do equal honor to Great Britain and to the United States, by making them parties to the permanent establishment of the great principle that neutral nations must assume a full responsibility for all acts done by their subjects in violation of the absolute and well defined duties of neutrality. The United States have never shrunk from accepting this principle, although their interest in its establishment is by no means greater, nationally considered, than the interest of Great Britain herself, and it is manifestly so much for the benefit of mankind at large, that if it can in no other way be fixed and made imperative, a general congress of the greater maritime powers may very properly be convened to take it, and with it the whole existing system of international law, into full and effective consideration.

HOW TO LOWER THE RATE OF TAXATION IN NEW YORK.

The management of public affairs in the city of New York has been for years the theme of the severest criticism. How far this is warranted does not seem, however, to be generally considered. It is always easy to declaim against official corruption, and to complain of prodigality and misrule; but not so easy to demonstrate in what the enormities consist, or suggest a proper remedy.

It should be remarked, however, that the charges of prodigality, improvidence and corruption, are well nigh universal on the Western Continent. Local affairs every where have been repeatedly criticised, and city charters amended, without effecting amelioration. More than two thousand of the citizens of Quebec, petitioned the Provincial Parliament to suspend their entire municipal government, and to place that city under the control of a commission. Action was deferred on the ground that the other Canadian cities were also suffering from bad administration, and the relief should be made general. San Francisco adopted summary measures of relief by instituting a Vigilance Committee under whose authority the most lawless were put to death and others banished from the State. A similar laxity in the maintenance of order and public safety is liable to be followed in other places by similar proceedings. It is the part men, etc.

of wisdom, therefore, to investigate the abuses now existing with reference to their speedy and efficient correction.

All our American cities seem to be overburdened with taxation, those of New England equally with New York and the West. To some extent, this is to be attributed to the expenditures required by the civil war; but the principal cause is improvidence. Changes of administrations do not appear to have resulted in much improvement, but have induced the people to conclude that a certain amount of extravagance and peculation will exist under any party. Hence so much apparent supineness.

Sixteen years ago, we well remember, when the valuation of New York was \$256,197,143, and the taxes amounted to three millions, relief was sought by amending the charter and placing the executive and administrative functions of the government in Departments. They had been exercised previously by committees of the Common Council. The change did not, however, arrest the general extravagance, as may be seen from the following table of the amount of annual taxation for the last fifteen years:

1851 .\$2,924,455 94 | 1856...\$7,075,425 72 | 1861..\$11,627,632 28 1852... 8,380,511 00 | 1857... 8,111,758 09 | 1862... 9,906,271 10 1853... 5,066,698 74 | 1858... 8,621,091 31 | 1863... 12,090,905 14 1854... 4,845,886 07 | 1859... 9,860,926 09 | 1864... 18,705,092 86 1855... 5,843,822 89 | 1860... 9,758,507 86 | 1865... 18,202,652 21

A burden so steadily and regularly accumulating must become Sisyphean, and is calculated to excite apprehension; and especially when it is also learned that the indebtedness of the city is increasing in proportions equally formidable, now exceeding thirty-four millions of dollars.

The mode of extrication from the labyrinth is by a course analogous to that which a sagacious individual would employ to retrieve his own desperate fortunes. The utmost economy of expenditure should be instituted, together with rigid accountability of public officers; and every means of enhancing the income of the city should be adopted. Unfortunately, retrenchment is seldom popular. Public trusts are made the reward of partisan service, and of course, any reduction of their emolument and of the political patronage accompanying, would create enemies to the officer or the party attempting it. Hence, as few spendthrifts ever reform their habits, so few persons elevated to power by a political organisation attempt or succeed in reducing their official expenditures. Yet the time has almost come when such steps must be taken.

New York has a municipal and a county government. The legislative functions were formerly vested in the Mayor, Aldermen and Commonalty; but in 1857, the Legislature divided them, and provided for the election of a Board of Supervisors to transact the business pertaining to the county. There are, also the Sheriff, the Register, the Surrogate, the Commissioners of Taxes and Assessments, the District Attorney, the four Coroners, the clerk of the Superior Court, the Commissioner of Jurors, the Justices of the Supreme Court, the Justices of the Superior Court, the Judges of the Court of Common Pleas, the Judges of the Marine Court, the Pilot Commissioners, the Commissioners of Excise, the Commissioners for building the new Harlem Bridge, etc. The Metropolitan Police Department, though a State Institution, and embracing several counties, is also provided for, so far as the city is concerned, by the Board of Superviors.

The departments of the city government, as distinguished from the county are as follows: the Common Council, the Mayor, the Board of Education, the Department of Finance, the Law Department, the Croton Aqueduct Board, the Street Department, the Department of Public Charities and Corrections, the City Inspector's Department, the Clerk of the Board of Aldermen, the Clerk of the Board of Councilmen, etc.

The relative expenditures under authority of the city and county government for the last five years, are as follows:

	•	
1860	\$6,085,448 60	\$3,673,059 26
1861	6,713,293 40	4,914,338 88
1862	5,111,056 08	4,795,215 02
1863	6,341,202 96	5,750,702 18
1864	7,566,648 96	6,138,443 90

It is not difficult to perceive that the creation of a double local government, and a plurality of Executive Departments has resulted neither in efficiency of administration or economy of expenditure. The number of office-holders, besides policemen subsisting from the public treasury is about three thousand, and with the continuance of the present system, they will multiply, not beyond the exigencies of the public service, for that stage has been passed many years since, but to an indefinite degree. There is no power practically to check this increase. Hence a thorough revision of the system is imperative, and a simple regime should be substituted, which should ensure official responsibility, and reduce by many hundreds the number of persons drawing salaries from the Treasury. As a corollary to this, and a necessary measure, the anomalous Board of Supervisors should be legislated out of existence, and the places of wealth which it has created for its members and retaining such as the new Court House and Harlem Bridge should be closed up speedily. Extravagant salaries, fees, and perquisites should also be done away with; and traffic in public offices and appointments punished and made infamous.

In addition to these reductions, there should be created a Board of Revision, to review all appropriations, with power to reduce them to the actual wants of the public service. One of this number should be the auditor of public accounts, and no moneys should be paid from the public treasury except under his signature after the approval of the Board. In this manner a large part of the annual expenditure would be saved,—probably one-half. A system of responsibility would also be instituted which would obviate the danger of future misrule.

But the work of public economy should not cease with reducing the army of office-holders, the fees and perquisites of jobbers, the salaries of pluralists, and the enormous outlays for constructing bridges and public buildings. The city of New York has many sources of income which should be rendered lucrative. She owns some twenty-five ferries for which a rent of \$171,800 is charged, but which might have been much larger if proper diligence had been employed to subserve the interest of the city. The amount actually collected, amounting last year to about \$150,000 is paid into the sinking fund. The rent of docks and slips amounts to about \$240,000; of which \$100,000 is annually appropriated for repairs, and the other expenditures reach double that amount. The slips and piers are actually leased for nominal amounts to privileged persons, who are not required to keep them in proper condition; whereas if they were placed in the hands of private corporations to be properly rebuilt, they would yield a tax equivalent to a quarter of our expenditures. The provisions of the charter are a practical nullity.

The markets are estimated at a valuation of \$1,171,000, and the consideration paid for their occupancy amounted last year to \$171,983 71. The expense for cleaning them amounted to \$13,645; and the regular salaries of superintends, clerks and other officials amount to about \$40,000; while it is alleged by some that the additions for minor officials such as sweepers, &c., more than annihilate the entire income. There is no good reason why the revenue from this source should not be tenfold what is actually obtained.

The city railroad companies have taken advantage of the Internal Revenue Act to levy an additional charge of one cent upon their passengers. Why should not the amount believe, throughout the country.

so obtained over and above the requirements of the General Government, be applied to public use? It cannot belong to the Company, and should be regularly collected from them. There is no good reason why corporations holding franchises, for which no consideration has ever been paid, should add to their receipts in such a manner.

It will readily be perceived from this exposition, that the revenues of the city of New York can be made ample to liquidate the burdens of government without resort to burdensome taxation. The subject is of vital importance, and should receive early consideration at the hands of the proper authorities.

THE RECIPROCITY TREATY.

Due notice of the termination of the Reciprocity Treaty was given by President Lincoln early in the spring of the present year, pursuant to joint resolution of Congress, to the government of Great Britain. There has been reason to hope that new negotiations would be at once opened. The following resolution as offered by Mr. Elijah Ward of New York, in the House of Representatives, December 14, 1863, contemplated such a course:

"Be it Resolved by the Senate and House of Representatives, etc., That the President of the United States be, and he is hereby authorised, by and with the advice and consent of the Senate to appoint three Commissioners to confer with persons duly authorised by Great Britain in that behalf, to negotiate a new Treaty, based upon the true principles of Reciprocity between the two governments and the people of both countries, with the view of enlarging the terms of the present Treaty, and for the removal of existing difficulties."

It is with some surprise, therefore, that we find no direct reference made to the holding of a new convention in any of the reports presented to Congress, but on the contrary the Secretary of the Treasury utters doubts as to the possible maintenance of any actual reciprocity embracing the principal articles included in the present treaty. This policy of reciprocal trade was not adopted without long consideration. It had been urged by our leading merchants and public men for many years previous. President Madison, in 1816, laid it before Congress in a special message. Mr. Monroe also attempted negotiations with Great Britain for that purpose. Repeated efforts were made in the administrations of John Quincy Adams, and General Jackson to institute reciprocal colonial trade. Acts of Parliament, orders in Council, laws of Congress and Presidential proclamations occurred for successive years, without much effect. Finally, in 1847, after many efforts on the part of our Government to draw it out, the British Minister at Washington proposed the arrangement. The matter lay in abeyance for several years. The New York Chamber of Commerce in 1852 memorialised Congress for a Reciprocity Treaty, with earnestness. It was urged by Mr. Webster, Mr. Everett, Mr. Cushing, General Dix, Mr. Clayton, Judge Douglas, Mr. Seward, Mr. Marcy, and other leading statesmen; and the Canadian Parliament in 1847 authorised the introduction, free of duty, into Canada of the natural productions of the United States, whenever the latter shall reciprocate by similar legislation. The Treaty was finally negotiated in 1854; and an act passed by Congress to carry into effect its provisions.

In 1855 this treaty went into operation, and was so satisfactory that the Chamber of Commerce the next year petitioned Congress to remove all commercial restrictions on the commerce of the Canadas and the United States, by admitting into the respective countries the the natural productions and manufactures of both, and to open to their vessels the coasting trade on the intervening waters of the two countries, with all the advantages that now exist between adjoining States. That sentiment verified by the experience of the last ten years, continues to be the judgment of the public men and merchants of this city, and of a large majority, we believe, throughout the country.

Nobody doubts that Canada has derived advantages from the operations of this treaty. It was to have been expected; it was to be desired. Montreal multiplied her trade many fold; Toronto increased hers; Quebec suffered. But those advantages have been fully reciprocated on our part. We have enjoyed the benefits of the fisheries on the British American coasts, while they have scarcely, in exchange, sent a smack into our waters. So important a matter has this right of fishing in British waters been regarded, that Mr. J. Q. Adams declared, in 1814, that he would continue the war with England for ever, rather than give it up.

Since 1850 Canada has over-imported from this country to the amount of \$63,038,638, and the other provinces \$52,896,294, making an amount of \$115,934,932 to balance the accounts. These are advantages which the abrogation of the Reciprocity Treaty will sacrifice without an equivalent. In addition, we lose the use of the Welland and St. Lawrence canals, which afford an outlet for the commerce of the Northwestern States.

Mr. McCulloch's proposition of reciprocal legislation can hardly be carried out. It has never been a successful agency of communication between nations. In legislative bodies only one party to the contract can have a voice, and hence conventions between both have been resorted to, as affording each side opportunity to stipulate. When the policy of mutual legislation shall have been adopted we will probably find ourselves somewhat close to the millennial period.

The people of the United States have had their full share of the advantages. In 1854 the value of the imports into Canada from this country was \$15,583,098; the next year it stood at \$20,828,671, an increase of one-third. The exports from Canada into this-country were increased at the same time from \$8,649,002 to \$17,737,277. The aggregate exports into Canada under the reciprocity treaty from 1855 till June 30th, 1864 have been as fellows:

The United States at the same time imported from Canada

Of course, as Canada is not a manufacturing country, her agricultural productions and lumber must constitute the staple exports to this country. The people of that province may thus "be sellers and we buyers of the same productions for which we are often forced to seek foreign market." But this would be no worse for us than it would be if we exclude them from our seaports by the abrogation of the Reciprocity Treaty. We thus compel them to go abroad by routes outside of this country, to take our foreign market away from us.

Besides, the British Provinces, other than the Canadas, import largely of our breadstuffs, and with the abrogation of the treaty will henceforth be supplied from Canada. Their aggregate importations from this country during the nine years immediately succeding the ratification of the Reciprocity Treaty, were valued as follows:

 Domestic and foreign goods
 \$77,381,568

 Breadstuffs
 \$2,215,647

The other objections urged by the Secretary of the Treasury against the treaty are founded upon a condition of things that we desire to see ameliorated. The people of the United States, it is declared, cannot consent to be taxed as producers, while those outside of our boundaries, exempt from our burdens, shall be permitted, as competitors, to have free access to our markets. Very likely; and if the policy of indiscriminate taxation is continued the people may yet feel like withholding their consent from that likewise. But we had been led to expect of the thirty-ninth Congress a dif-

ferent policy; one by which industry should be less burdened and commerce less hampered. Certainly, the time has come when more judicious taxation might be substituted for the present system.

The trade now carried on between this country and the British North American provinces amounts to from the fifty millions of dollars a year. The salutary influence of so vast a commerce is apparent. The abrogation of the Reciprocity Treaty must tend to drive it away. In place of comparative free trade we shall have smuggling, and an expensive system of almost useless custom houses. The wisdom of such a change is not easy to perceive. Commerce increases wealth and develops civilisation; and we hope that the present administration, while seeking trade to the ends of the earth, will not reject that which lies at our own doors. Such a proceeding will be of the character which Talleyrand once denominated a "mistake."

ANALYSES OF RAILROAD REPORTS. No. 10.

CINCINNATI, HAMILTON, AND DAYTON RAILROAD.

The Cincinnati, Hamilton and Dayton Railroad extends in a very direct line from Cincinnati on the Ohio River, via Hamilton to Dayton—with a double track throughout—a distance of about 60 miles. The company has also constructed a separate track for the use of the Atlantic and Great Western Railway Company, at a cost of a million dollars. Though a short road it is among the most important in the American system, being one of the main avenues into Cincinnati from the North, receiving at its northern terminus, and also at Hamilton, several important lines which it continues into the city.

This road occupies a very favorable position, passing as it does through a country thickly populated, with cities of great importance at its termini and also on its line. Out of the fourteen years of its existence there have been only two years in which no dividend was distributed, and in those the necessary amount was earned, but withheld to pay off debts then due. In all twenty dividends have been paid, amounting to 88 per cent on the shares in existence at the time of payment, and also a stock dividend of twenty per gent. This success is not due alone to its position, but much, of course, is the result of good management.

The reports of the exmpany are less explicit than they ought to be in relation to the business of the road. The number of passengers, however, has been given yearly, also some account of the number of engines, and the mileage made by them. The number of passengers carried on the road, and the earnings therefrom, for the past 13 years have been as follows:

Years.	Number.	Earnings.	Years.	Number.	Earnings.
1852-53	286,828	\$191,700 98	1839-60	857,700	\$286.468 48
18:3-54	842,954	274,650 39	1860-61	479,987	275.463 70
1854-55	370.189	259,915 85	1861-62	358.992	272.117 30
1855-56	852,457	286 668 12	1862-63	441,250	348,893 39
1856-57	362.630	231.571 54	1~6.4-64	527,451	457.162 85
1857-58	470.951	213.438 48	and-		
1858-59	339 272	223.505 29	1864-65	542 539	614 944 58

The reports are too irregular in their freight returns to make them of any statistical value. The average tonnage for the last ten years has been about 250,000 tons, ranging from 225,000 to 275,000 tons per annum. The earnings from freight for each year since the completion of the road are given in a subsequent table.

The financial condition of the company, as exhibited on the balance-sheet at the close of each fiscal year, is shown in the following statement:

Fiscal years.	Share capital.	Bonded debt,	Other debt & liabil's,	Surplus, re- serve. &c.	Total
1851-52	\$1,463,325	\$583,000	\$78,649	\$33,736	\$2,158,710

*Total property and assets, \$2,124,974.

The road account for 1863-64 included \$657,762, and for 1864-65, \$1,010,989—the cost of the six-foot track for the accommodation of the Atlantic and Great Western Railway Company.

The following table shows the earnings and expenses of the road from its completion and opening, on the 30th September, 1851, to the close of the fiscal year 1864-65:

		Gross E	arnings-		Operat-	Net
Fiscal	Passen-		Mails,		ing	earn-
vears	gers.	Freight.	etc.	Total.	expenses.	ings.

1862-63	348,893	446,633	81,878	877,404	390,537	486,467
1863-64	457,163	526,758	99,407	1,083.328	554,507	528,821
1864-65	546,810	614.945	80.102	1.241.857	738,629	503,228

The profit and loss account for the same years is shown in the following table:

	Earnings		- Disbu	rsements -		Surplus
	less	Taxes &	Int. on	Dividends	Total	after
Fiscal years.		insurance.	debt.	on stock.	amount.	
1851-52	\$62,032	\$	\$28,296	\$	\$28,296	\$33,736
1852-53	200,956	9,234	56,992	126,466	192,692	8,264
1853-54	276,814	14,469	46,207	207,350	268,026	7,788
1854-55	272,706	14,102	92,108	101,560	217,770	54,936
1855-56	278,013	13,717	108,217	101,560	223,494	54,519
1850-57	297,617	11,816	110,316	75,458	197,685	99,932
1857-58	260,763	13,102	104,322		117,424	143,339
1858-59	249,667	5,315	99,627		124,942	144,725
1859-60	272,115	10,958	97,200	150,906	259,764	12,351
1860-61	282,699	11,519	96,585	150,906	259,010	23,689
1861-62	329,714	13,706	95,031	161,685	270,598	59,116
1862-63	486,467	22,042	93,602	222,247	337,891	148,566
1863-64	528,821	33,130	93,380	239,964	366,474	162,347
1864-65	503,228	62,430	112,170	257,895	483,737	19,491

In the total of disbursements are included sundries not otherwise accounted for. In 1864-65 the large sum of \$51,242 is thus disposed of, the same being chiefly payments on account of damages from a collision.

The dividend paid in May, 1865, was the 20th since the road commenced operations. The rate per annum has been as follows:

Years.		Years.	P. c.	Years.	P. c.
1851-52No. 1	4	1856-57. No. 7 & 8	736	1861-62No. 13 & 14	736

so seldom quoted or sold at the New York stock boards that we are unable to compile a table similar to those which have accompanied the reports of the roads we have previously analyzed. The stock of this company, however, is not with ordinary good management likely to fluctuate greatly as its actual value is well known.

COTTON, AND HOW TO GUARD AGAINST LOSS BY FIRE.

The value of the cotton lately destroyed by fire is so great as to have awakened unusual attention, and given rise to many theories as to the probable cause. With a view to guard for the future, as far as may be, against loss by fire, we would call the attention of those engaged in the management of cotton to the following excellent recommendations prepared and furnished us by Capt. I. H. Upton, Secretary of the Board of Underwriters. If they were carefully observed, we are persuaded that little would be heard hereafter with regard to the spontaneous combustion of cotton.

A-To the Planter: 1st To exercise great care that cotton is not packed wet, or with oily locks in the bale.

2d. To use sufficient bagging to completely envelope the bale, so that no cotton may be exposed to accidental sparks. It would be well if some less combustible material were substituted for bagging.

some less combustible material were substituted for bagging.

3d. The use of the iron tie commends itself for both economy and security. It enables the planter to put his cotton in market in better order, with less waste, and, in case of fire, enables much cotton to be saved which would be destroyed with rope. Its persistence keeps the bale to a smaller size, and insures a greater degree of uniformity, enabling the vessel to stow more, and to better advantage.

4th. In many instances too little care is taken to guard against stowing cotton in wet places. It should be protected from dampness by good dunnage, and, as far as practicable, have a sufficient covering from rain.

ram. B-To the Inland Carrier: 1st. On all river steamers, coal should be used on the downward trip. The greatest danger is in calm weather, or with a light, following wind. With much wind the sparks are mostly carried so far as to fall in the water, and at such times there is more danger from other boats, unless they pass to the leeward. A good watch for sparks should at all times be kept.

2d, Lard, lard oil, bacon, and other eily matters should not be stowed in contact with cetter.

in contact with cotton.

3d All passengers will smoke; the only remedy is in watchfulne s, and the use of tarpaulins to cover the cotton on the guards.

C—To the Cotton Press: 1st. It is well known, that in the busy season, there is not sufficient shelter for cotton in New Orleans, and other

cotton shipping ports. Cotton which has lain under the eaves of sheds, or been exposed for a long time to hard rain, is in a favorable condition to ignite spontaneously

to ignite spontaneously.

2d. A strict regulation, prohibiting smoking in every form, should be enforced at each press, and conspicuous notices to this effect should be exhibited. This should particularly extend to the draymen who take the cotton from the press to the ship.

3d. At some presses much care has been judiciously bestowed in providing hydrants and hose, to use in case of fire. There should be no exceptions. Experience has a own that a full supply of common bu kets, always filled and conspicuously placed, would prove of very great value, for even the time necessary to attach a hose and open a water-plug will allow a fire to get such headway as to be controlled with difficulty, whilst if a man could catch up a bucket and apply the water at once, some fires could be extinguished before any great damage was done.

4th. There is some danger from the sparks from the chimneys of the

4th. There is some danger from the sparks from the chimneys of the presses, and observation has shown that it is greatest in the early morning, when the fires are about being started, as wood and other light materials are used for that purpose. Coal only should be used, and increased care exercised at the time of kindling.

5th. In all preparations for marking, no turpentine, linseed oil, or other combustible liquid, should be used.

D-To the Ship-Master: 1st. With a cargo so easily ignited, so difficult of detection in early stages, and so uncontrollable when fully on fire—the only safety is in prohibiting fires on board ship while receiving cotton. There is very little doubt but that sparks from the galleystove have caused the destruction of many vessels. Their vicinity to the open hatchway makes them peculiarly dangerous. In ports where cotton is received in the open roadstead, there seems no mode of dispensing with living on brard; but, in New Orleans, there is no reason

cotton is received in the open roadstead, there seems no mode of dispensing with living on board; but, in New Orleans, there is no reason why fire should not be prohibited, as well as in the docks of Liverpool.

2d. No fires should be allowed on the levee while cotton is being shipped, for weighers' furnaces or other purposes. If steam-hoisters are used at all, they should be supplied with coal for fuel. There is danger in their use, from the fact that they are placed so near the cotton going on board.

3d. A rigid enforcement of the prohibition against smoking should be exacted; and masters and mates should forego the indulgence in 80-61 66.989 10.737 5.859 4.878 54.51 be exacted; and masters and matters and 4th. Some lubricator is necessary for the jack-screws, and sweet (lard) oil seems now to be regarded as least dangerous. Some substitute less calculated to cause spontaneous combustion, perhaps in the form of paste, is a desideratum. The practice of carrying oil into the ship's hold in the ordinary glass bottle, cannot be too severely condemned; in all cases a metal can should be used, so formed as not to spill casely when overtired.

ed; in all cases a metal can should be used, so formed as not to spin easily when overturned.

5tb. The decks should be well caulked before receiving cargo, and the wings should be extra dunnaged, to prevent the possibility of danger from the cotton absorbing bilge-water.

6tb. No cotton should be carried on deck; and if any in the house on deck, it should be carefully closed as soon as stowed. The hatches should in all instances be caulked and battened before the tug comes

allogside.

7th. When river or other steamers are passing cotton-loading ships much care is required to prevent danger from their sparks.

8th. Efficient lightning conductors should at all times be provided; and a due degree of care taken to see that they are properly insulated, and the connection with the water unbroken.

9th. At sea, any communication with the hold of the vessel can only be the real or suspected presence of fire; and constant

9th. At sea, any communication with the hold of the vessel can only be excused by the real or suspected presence of fire; and constant watchfulness should be exercised to detect its earliest symptoms, as it is only then that any hope of safety can be entertained.

Finally. This subject is of such importance as to commend itself to the careful consideration of all; and it is only by the exercise of vigilance and care on the part of all engaged in the transportation of this great stap'e of our country from the plantation to the manufactory, that any thing like immunity from fire can be looked for.

Literature.

Annual of Scientific Discovery; or, Year-Book of Facts in Science and Art for 1865. Exhibiting the most important discoveries and improvements in mechanics' useful arts, national philosophy. chemistry, astronomy, geology, zoology, botany, mineralogy, me-teorology, geography, antiquities, etc., etc. Edited by David A. Wells, A.M., M.D., Boston. Gould & Lincoln.

This book is published near the commencement of every year, presenting a compact, carefully arranged, and easily accessible summary of all the important new facts and theories in every department of science and the industrial arts which have been awarded to the world during the preceeding twelve months. The present volume contains a complete resume of the recent discoveries respecting the "prehistoric man," and the antiquity of the human race; a report of Tyndall's recent investigations in relation to light and heat; photo-sculpture; Draper's speculations on the transition of matter; recent improvements in war implements and constructions; on the cultivation of fish; production of sexes at will; utilization of sewerage; production of petroleum; use of steam expansively,

The volume contains also notes on the progress of science during the year 1864, obituaries of deceased scientific men, etc., comprising in short a vast amount of scientific matter compressed into the smallest compass consistent with its intelligibility. The "Annual" has been published for sixteen years, and occupies an important place in the scientific world.

The Dutch Pilgrim Fathers and other Poems, humorous and not humorous. By EDWARD HOPPER, New York; published by Hurd & Houghton, 1865.

A rare little poem, which the descendants of the Knickerbockers. to whom it is dedicated, ought to give the favored place upon their shelves. It begins by a humorous referrence to the "Universal Yankee Nation;" then takes up the "Old Dutch Pilgrims," as fol-

Fair Hudson's banks, the loveliest stream that flows, Were rescued from wild Indians by their hands; They planted Wall street, where the money grows, To gather golden fruits o'er all the lands; And all New York's proud palaces arose From gable-ends sawn by their public hands; And all our commerce, enterprise and trade Sprang from the bargains which the Pilgrims made.

The other poems in the collection are also productions of decided merit, and commend their writer to general favor. He has a rare faculty to appreciate the merit and humor of a subject, and to depict with apt and spirited illustration.

A Treatise on Astronomy. By ELIAS LOOMIS, LL. D. New York: HARPER & BROTHERS, 1865.

Professor Loomis's treatise takes its place as a text-book for instruction in the first principles of Astronomy. Its language is simple, concise, and attractive; and its divisions and sections have been arranged with reference to leading the student by gradations comparatively easy, from the elementary to the deeper principles of the science. In two respects the work differs from predecessors in

the same field. Mathematical problems are inserted designed to test the student's familiarity with the principles in which he has been instructed. Prof. Loomis has also dwelt more fully than is customary on physical phenomena, such as the constitution of the sun, the condition of the moon's surface, the phenomena of total eclipses of the son, the laws of the tides, the constitution of comets, results of recent researches respecting binary stars, etc. There is no royal road to learning, but elementary works like this make it attractive, and operate to increase the number of the votaries of knowledge,

Reminiscences, Historical and Biographical, of Sixty-four Years in the Ministry. By Rev. Henry Boehm, Bishop Asbury's Traveling Companion, and Executor of his last Will and Testament. New York: Published by Carlton & Porter, 1865.

This quaint parrative of Rev. Mr. Boehm is invaluable to those desirous of obtaining information in regard to the early history of Methodism in America. The author sits down at the hearth-stone with you, and relates his story of the olden time, like the old grandfather that has the honored seat. He was of a Swiss family some. what celebrated for their interest in religious matters. The early representative in Switzerland was a Presbyterian; his son was a "pietist;" the grandson a Mennonite who emigrated to Lancaster, Pennsylvania, and the next in the pedigree, Rev. Martin Boehm was ordained, together with Rev. William Otterbein, Bishop of the church of United Brethren in Christ. The subject of this narrative was his son. He was associated with the Methodists, and entered the ministry at an early period in life. The scenes of his labor are very interesting, and depict forcibly what Methodism was in the formation. They abound with descriptions of the preachers who had to labor in the Middle States, and are so admirably detailed as to make the reader seem almost to be [personally acquainted with them.

The Cyclopedia of Biography; a Record of the Lives of Eminent Persons. By Parke Godwin. New edition. With a supplement brought down to the present time. By George Sheppard. New York: Published by Hurd & Houghton.

The first edition of this book was published in 1851. It had an immense sale, and commended itself to favor by its extraordinary brevity, its accuracy, and the great variety of information which it contained. It seemed to omit nothing that was indispensable. The compiler, Mr. Parke Godwin, now of the Evening Post, was admirably qualified by his extensive knowledge of men and facts, his habits of accuracy, his great discretion and thoroughness, to prepare such a manual; and the enterprise, as was to have been expected, proved a success. The occurrences of the last few years supplied additional material, which Mr. Sheppard has elaborated and appended; and we have now a new edition which will for many years be indispensable on the table of the student.

Plain Talk on Familiar Subjects, a Series of Popular Lectures. By J. G. HOLLAND. New York: CHARLES SCRIBNER & Co., By J. G. Holland. N 124 Grand street. 1866.

The writings of "Timothy Titeomb" have long occupied a popular place in American literature. Attractive in their style, and replete with homely common sense they preserve their interest for a lifetime. The volume before us consists of lectures upon the following topics: I. Self-Help; II. Fashion; III. Work and Play; IV. Working and Shirking; V. High Life and Low Life; VI. The National Heart; VII. Cost and Compensation; VIII. Art and Life; IX. The Popular Lecture. Doctor Holland makes no changes in the verbiage of his lectures: they read just as he delivered them. No library is complete without a copy.

GREAT BRITAIN.

LONDON AND LIVERPOOL DATES TO DECEMBER 2

THE Money Market has been easier during the week, and there was a general feeling of returning confidence. The English funds returned at the commencement of the week to the point at which they stood at the time of the first advance of the Bank of England rate of interest. An impression prevailed that a further reduction in the bank rate of interest would take place.

in the bank rate of interest would take place. But the weekly statement passed off without any change.

There has been a good demand for accommodation at the Bank of England and in the general market Stock Exchange settlement. aided by preparations for a large amount on mercantile paper, including many Brazilian bills, which fell due towards the close of the week. The terms for choice bills are $5\frac{\pi}{4}$ to 6 per cent. In the Stock Exchange a large amount of money has been lent, at 51 per cent.

ank ent, In the General market Bank shares are barely supported; and the Financial Companies' shares are flat. The closing quotations are as follows:—International Financial to 1 prem.; General Credit 2½ to ½ prem.; London Financial 6 to ½ prem.; Imperial Mercantile Credit 2½ to 3 prem; Credit Foncier and Mobilier 4½ to ½ prem, ex div, and new; and ditto new 3½ to 4 prem.

There has been a fair business during the week in United States are stated on the state of th

There has been a fair business during the week in United States Five-twenty bonds. There was a large speculative business in Krie shares which closed at an advance.

Proposals have been issued for subscriptions for £2,771,600 seven per cent mortgage bonds of the Atlantic and Great Western Railway, at the price of 80, including a half-year's coupon due on the 15th January next. The amount of bonds already outstanding is £3,228,400, and the present issue will therefore complete the entire contemplated sum of six millions sterling, while the share capital also represents a similar amount. The total length of the line, which commands the western traffic, and also that of the oil regions, is 607 miles.

which commands the western traine, and also that of the oil regions, is 607 miles.

The foreign stock market was active at advanced prices on last week's quotations. The railway markets of London and Liverpool were well supported.

The General Credit and Finance Company of London have received \$9,272.88 on account of the Venezuelan Six per cent loan of 1861. of 1864.

At the meeting of the Financial Discount Company a dividend of 10s per share has been declared, being at the rate of 10 per cent

per annum.

The dividends due the 15th of December on the bonds of the Bay of Havana and Matanzas, and Matanzas and Sabanilla Railroad Companies have been announced.

A prospectus has been issued of the National Cattle and Meat Company, with a capital of £1,000.000, in £5 shares. The object of this Company is to supply meat to the public at a reduced price.

Mr. Spencer Price, manager of the late China and Japan Steam Navigation Company, and now connected with the China Steam and Labuan Coal Company, has returned to England from a lengthened visit in China and Japan, as well as India, and we believe he brings home some advantageous proposals for extending the opera-

ened visit in China and Japan, as well as India, and we believe he brings home some advantageous proposals for extending the operations of the undertaking.

The Board of Trade returns for the month of October, just issued, sgain exhibit extraordinary totals. The declared value of exportations has been £15,547.225, showing an excess of £2,675,734, or about 20 per cent increase on the corresponding month of last year. In the shipments of cotton yarn there has been an increase of 147 per cent in quantity and 105 per cent in value, and in manufactured cotton goods 40 per cent in quantity and 23 per cent in value. In woolen manufactures the export trade has also been singularly heavy, the increase being 112 per cent in quantity and 42 per cent in value. The railway traffic returns of the United Kingdom for the week ending the 18th ult, show the large increase of £49,290, or nearly \$\frac{3}{4}\$ per cent, while the mileage increase interval has been only about

84 per cent, while the mileage increase interval has been only about

3ª per cent.

THE CONTINENT.

PARIS DATES TO DECEMBER 2.

The returns for the Bank of France indicate an unsettled market. The returns for the Bank of France indicate an unsettled market. There is an increase of cash and discounts and a decrease of treasury balances. Gold in considerable sums has arrived from England and other sources, but it has been quickly absorbed. Nevertheless as the rates of specie in the leading monetary markets now rule in favor of Paris, it is expected that there will be a speedy restoration of ease, toward which there is an increasing tendency.

The loss of gold in the Bank of France statement for the week is attributed to the payments on account of the new Austrian loan, the lists of which have been closed.

the lists of which have been closed.

The Bourse is dull and unsettled. Government funds are lower. Money is difficult at increased rates, but it is expected that the severity of the crisis has passed, and a better feeling is already ob-

severity of the crisis has passed, and a better reening is arready observable.

The reported outbreak between Spain and Chili created considerable interest in the chief financial centres on the continent, and induced energetic remonstrances to the respective governments. It is understood that spirited communications had been forwarded by France, England and other countries to Madrid, which produced the effect of inducing the Spanish government to consent to the submission of the differences to the arbitration of the Western powers. Spanish bonds of all kinds declined in consequence of the rumors of war, and the wretched condition of Spanish finances indicate that the country is in no condition to bear the strain of a war of any kind. a war of any kind.

In reference to the recent statement that the Portuguese Govern-In reference to the recent statement that the Portuguese Government contemplates a new loan, the Minister of Finance explains, in a document just submitted to the Chambers, that he considers the present floating debt of the country, which is about £2,600,000, bearing an average interest of nearly 7 per cent., to be as much as should be permitted, and that being desirous of preventing a recurrence to the system of raising money by Treasury bills, as of late years, whether it be to cover the annual deficit or for any other purpose, he has introduced a law which deprives the Government of the powers hitherto granted for such purposes unless specially authorized at any future period, in which case they must at the same time propose the means for raising revenue to meet the expense incurred.

COMMERCIAL AND MISCELLANEOUS NEWS.

Total	\$955,76	34,322 \$1.50	4,548,690	548,779,368

The above tables do not show the exact comparative differences between the years 1863 and 1864, because the latter year embraces the crops of Kentucky, which are not in the year of 1863. Deducting from 1864, the comparison will be as follows:

TABLE OF COMPARISON BETWEEN 1863 AND 1864.

	1863.	1864.	Increase.	Decrease.
Bushels	888,546,554	959,821,150	71,274,596	
Tobacco, lbs	163,353,082	140,503,760		22,849,322
Hay, tons	18,346,730	18,004,366		342,361
Average		53,950,797		1,185,451
Value of crops .		\$1,440,415,435	\$484,655,118	

The table of comparison between 1863 and 1864 exhibits much that is important. The increase in the bushels of grain is large, and the decrease in the pounds of tobacco raised is also great. The decrease in acres cultivated is 1,185,451, but the increase in the value of the above crops is \$484,651,113.

The first increase is from the corn crop, and the last may be attributed to an increase in the currency, or a spirit of specn-

In the Western States the Wheat crop is very deficient in quality. It has been estimated by the department that the deficiency in both quantity and quality is 26.241,698 bushels; in quantity alone, 12,172,944 bushels. The quality of the corn crop is excellent, and that of the remaining crops is believed to be an average. The number of bushels in 1865 exceeds those of 1864 by 215,071,411.

LIVE STOCK.

The following table shows the total number of live stock for January, 1864 and 1865, the increase and decrease thereof, the general average price of each kind, the value of each kind, and the total value of all;

THE SOUTH.

The Commissioner gives the following account of the farms in the Southern States:

The average size of farms in the United States, in 1860, was 199 acres; almost double the average for Great Britain, which, in 1851, was 102 acres only, notwithstanding the great size of many baronial and aristocratic "holdings"—there being no less than 170,814 farms in the kingdom, or considerably more than one-half of the entire number, having less than 50 acres each. But the average in the Southern States is for greater than the general average for the United States, as the following table will show.

Total wang tarete wan the	Improved lands.	Unimproved lands.	Number of farms.	Av. No.
Delaware, acres	637,065	867,230	6,658	151
Maryland	3,002,267	1,033,304	25,494	190

Missouri	6,246,871	13,737,939	92,792	215
Total	74,362,565	171,101,718	761,867	320

In the distribution of seeds, 234,945 packages have been delivered to senators and representatives in Congress, 119,692 to agricultural and horticultural societies, and 408,583 to regular and occasional correspondents, and in answer to personal applications—making total of all varieties of seeds of 763,231 packages.

The distributions from the experimental and propagating garden during the past year have been mainly confined to varieties of small fruits, such as grapes, strawberries, gooseberries, raspberries and curranta. Of these about thirty-five thousand plants have been distributed through the usual channels.

COPPER MINING COMPANIES .- The following statistics of the Copper Mining Companies of Lake Superior, have been compiled from official sources by Dupee, Beck & Sayles, stock brokers, 22 State street, Boston:

FRIDAY, P. M., Dec. 15, 1865.

THE MONEY MARKET .- There has been no change of moment in the course of monetary affairs during the week. The withdrawal of a large amount of legal tenders into the Sub-Treasury, through the sales of gold, has had no appreciable effect upon the supply. Brokers have been able to get all they required at 7 per cent on call, and the discount market has been well supplied. The receipts of currency from outside are merely nominal, exchange on Cincinnati & Chicago being at par. At New Orleans, exchange on this city is at a discount; and the balance between New York and Boston is still against us. So that no dependence can be placed upon outside supplies of money. The openings of the port trade is likely to produce an early increase of bills at the West, and a remittance in that direction may occur at any

To-day the Sub-Treasury commenced the payment of interest upon the second series of Seven-Thirties. The whole amount of interest due is \$10,950,000; the payment of which will produce early ease in the market.

There is still a large amount of commercial paper coming upon the market, which meets with slow sale. The discount houses have an imperfect knowledge of the standing of money prices, owing to business having been so long transacted upon a cash basis, and they consequently give precedence to the old names, whose standing has been good throughout the war; while other names less known are much neglected, and have to sell at a heavy rate of discount. This difficulty in the way of negotiation will, however, disappear gradually, and paper now discarded will soon find buyers.

The best names pass at 7a9 per cent; other grades continue at 10a15 per cent.

The universal rate on call is 7 per cent.

RAILROAD AND MISCELLANEOUS STOCK .- There has been a more general speculation movement during the week. Lenders have been able to supply all the applications of the brokers, which has encouraged operations. A considerable number of new firms have come upon the street during the last few months, who being unable to procure outside business have operated freely upon their own account; while the older firms have been doing but little. The opening of the new Stock Exchange building, and the holding of several daily sessions by the old board, has also tended to foster activity of business. The week opened with a brisk bear movement, supported by strong parties; an attack was made upon some of the leading shares, with temporary success; but the large current purchases to cover outstanding "short" contracts checked the downward tendency, and prices close to-day generally higher than a week ago. The annual report of the New York Central road, presented at a meeting of stockholders this week, had the effect of depressing the price of the stock, the exhibit being less favorable than was anticipated, and the market generally sympathized. It has since being explained, with what truth we know not, that the report was made up with a glowing aspect to influence future legislation at Albany.

To-day, Ohio and Mississippi Certificates have taken an upward leap of 11, on the strength of the annual report presented at the meeting of the Company held on Wednesday. The earnings of the road show an increase of \$448,062 over those of 1864, with a decrease in the expenses of \$149,096; making the net earnings \$597,159 larger than those of last The report estimates that the business for the year ending December 31, 1865, will show a balance of earnings over expenditures amounting to \$1,016,622. Cleveland and Pittsburg has been sold heavily, as is supposed, by parties who had bought up largely to control the election of directors, the price, however, has been well sustained.

Large purchases have been made of Cleveland & Toledo, upon the understanding that a new feeder will be early added to the road, materially increasing its traffic. The price has advanced 71 during the week.

Beneath the present buoyant tone of the market, there is a feeling of mistrust in the continuance of the current large earnings of the roads. The present inactivity of the older houses is very much attributable to an apprehension that the competition of the Mississippi route will largely reduce both the rates and the freights of the principal roads; and hence they are willing to unload into other hands.

The following were the closing prices for leading shares on Saturday last and to-day:

	Dec. 15.	Dec. 9.
Canton Company	4536	
Cumberland Coal	4414	441/
Quicksilver	47	4734
Marinosa	15%	1436
New York Central	9636	96%
Erie	93%	9216
Hudson River	108%	10834
Reading	116%	115%
Illinois Central	133	133
Michigan Southern	75	7436
Cleveland and Pittsburgh	883%	93%
Northwestern	3514	35%
" preferred	623/8	6314
Rock Island	107%	105%
Cleveland & Toledo	10236	105
Fort Wayne	105%	105%

United States Securities .- The favorable effect of the annual exhibit of the Secretary of the Treasury continues to appear in the advance of Government securities. During the week there has been a steady advance in quotations, resulting from a demand from the public for investment. The advices of the steamship Java, reporting an advance on Five-twenties in London to 647, accompanied with liberal orders for the issue of 1862, has also materially strengthened the market.

Yesterday Five-twenties of 1862 touched 1041, but subsequently declined to 104, at which they close to-day. The second issue has advanced 1 per cent. during the week, and toe third 1 per cent. Ten-forties are 5 better. Seven-thirties have been especially in demand, and are 3 to 1 per cent.

To-day the half-yearly interest upon \$300,000,000 of Seven-thirties, the second series, falls due, amounting to \$10.950,000.

There has been some whispers on the streets of an early issue of proposals by the Secretary of the Treasury for a new long loan. The rumour, however, appears to lack authenticity, although it is considered probable that, should the later issues of the Six per Cents. stand firmly above par, the Secretary would not be slow to avail himself of the opportunity of borrowing, say \$50,000,000, assuming that the authorization be early granted by Congress.

The following were the closing quotations for leading securities on Saturday and to-day :

	Dec. 15.	Dec. 9
U. S. 6's, 1881 coup		10736
U. S. 5-20's, 1862 coupons	104	1023

U. S. 7-30's 8rd series	9734	96%
U. S. 1 vr's certificates	97%	073

THE GOLD MARKET .- The Government suspended its sales of gold early in the week, having sold, it is supposed, about \$7,000,000 from the beginning of the operation on the 6th inst. The foreign bankers were liberal buyers at 1441/a1451/ and have deposited their purchases in the Sub-Treasury. The stoppage of the Treasury sales has been followed by a steady rise in the premium. The lowest price touched, during the week was 1443 on Monday, and the highest 1463, to-day. The prevailing idea is that the price will average about 1472, and considerable purchases have been made, upon that supposition, for future use; so that notwithstanding the lage amount that has come out of the Treasury the supply is no larger than fourteen days ago.

The following have been the highest and lowest quotations on each of the last six days:

		Highest.				Highest.	
Dec.	9	1442	144# 1	Dec.	13	145	145

Foreign Exchange.—The transactions in exchange for Wednesday's steamer were quite large, and chiefly on the Philadelphia banks for last and previous week:

basis of 1093@1091 for banker's 60 days sterling. advance of cotton at Liverpool, the consequent increase of exports from this side, and orders for Five-twenties and Erie stock brought by the Java, have, however, weakened the market, and the rate for sterling forto-morrow's mail is 101 lower. We quote:

Bankers' Sterling, 60	1.0.0	Swiss	5.161 @5.181
days	109% @ 109%	Hamburg	36%@ 36%

Totals...... \$227,839,344 15,622,780 16,570,618 176,480,562 48,271,757 The deviations from the returns of the previous week are

as lollows.			
LoansSpecie	Dec. \$1,358,500 Inc. 2,191,677	Deposits Inc. Legal Tenders Inc.	957,668 50,952

The statement is generally favorable. The increase of \$956,668 in the deposits, and the decrease of \$1,358,500 in the loans, indicating an increase in the loanable resources of the banks. The large increase of \$2,191,677 in the specie line, is the consequence of large sales of gold made by the Government.

The several items compare as follows with the returns of

1			Circula		Legal	Aggregate

The Commercial Times.

COMMERCIAL EPITOME.

Trade wears a feverish, unsettled aspect. There are so many contending influences upon the markets, that there is no regularity to the course of prices, and no steadiness in demand. The fall and subsequent rise in gold, has somewhat encouraged speculation in domestic products, especially Breadstuffs. Cotton and provisions shared this influence, but with less success in advancing prices. Foreign importations find a slow market, except in very few instances. The political rumors lead many to still expect a rise in gold-the advance this week seems to have had no other basisand they are, therefore, slow to part with goods at prices on a currency basis. But we notice a renewal of the experience which has not prevailed latterly-that is, an advance in the premium on gold, has a tendency to reduce gold prices, even for those articles which are sold exclusively on a gold basis, showing conclusively that our markets will bear very little advance in currency prices-if made, it will be at the risk of a serious diminution of consumption.

Cotton has fluctuated, but the close shows very little change from last week. Breadstuffs have more than recovered the decline that took place early in the week, and close firm.

The interest which centres in the Provision market is now very great. The speculative demand has been very active,-favored at the middle of the week, by a material falling off in the receipts of hogs at this and the western markets; but it is found difficult to infuse confidence into the market-and prices have on the whole been without important advance. All accounts from the West agree that the packing season is very much behind former years; but, as the English orders for Bacon are very cautiously executed, at moderate prices, no apprehension of a short supply is felt. It seems to be expected that the packing will be active when it is once commenced, and that the hogs will make up in weight what they lack in number. Lard having declined moves off rapidly. Hogs are now arriving more freely at all points with favorable weather for packing. Beef, Butter and Cheese are inactive, and prices irregular.

Groceries of all kinds have been very dull; coffees and sugars have declined, and in other particulars the tendency downward. To-day, however, there was renewal of demand in coffee and rice.

Metals show much firmness. Copper declined subsequent to our last, but on the news by the Java, reacted and closed buoyant. It is now thought the difficulties between Spain and Chili are not likely to be easily settled. Pig tin has latterly been more active, at very full prices in gold. Other metals show no important change.

Naval stores have had a downward tendency, especially tar, of which the supply has materially increased. Oils are quiet and un-

Hides have experienced a slight relapse in gold prices. Leather quiet and unchanged. Fruits and fish tending downward. Petroleum has been firm with a fair export business. Several thousand barrels are being loaded at Philadelphia for European markets.

There is an improved demand for wool at the decline which has been acceded to during the past month. Prices are now relatively very low, and manufacturers seem disposed to purchase somewhat beyond their immediate wants. There is no advance to notice-in fact, some yielding in coarse wools is reported, but only from previous nominal quotations.

Whisky has declined, but closes more active. Tallow has been active for export, and closes firm.

East India goods have been quiet, if we except a speculative movement in gunny cloth and gunny bags; with large sales on the spot and to arrive, a considerable advance has been established.

Freights have been inactive, till rates for grain declined a penny Provisions are going forward in moderate quantities at steady rates. The imports from foreign ports of a few leading articles for the week and since Jan. 1, 1865, and for the same time last year, have

been as lono	ws:

TIDE-WATER RECEIPTS.—The quantity of flour, wheat, corn and barley, left at tide-water during the first week of Dec, in the years 1864 and 1865, was as follows:

1864	bbls. 55,100	bush. 657,900	Corn. bush. 70,500	bush. 192,900
1865	70,500	593,900	803,000	268,200
Incr	15,400 D	ec. 64,000	Inc 783,100	Inc. 75,300

The aggregate quantity of the same articles left at tide-water from the commencement of navigation to the 7th Dec. inclusive, during the years 1864 and 1865, was as follows:

| Flour. Wheat. Corn. bush. 1864 | 1,184,300 | 15,465,600 | 10,352,408 | 3,045,900 | 1865 | 934,300 | 9,998,400 | 18,116,700 | 4,269,100 |

Dec 250,000 Dc 5,462,200 In7,764,300 In.1,223,200

The receipts of the new crop of barley to Dec. 8th, were 4,004,300 against 2,879,000 bushels same time last year; showing an excess of new crop this year of 1,214.500 bushels.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the com-

mencment of navigation to and including the 7th of Dec., in the years indicated :

Canals opened	1863. May 1.	1864. April 30.	1865. May 1.
Flour, bbls	1,546,000	1,084,300	931,300
Wheat, bush	23,069,400	15,465,600	9,998,400
Corn	20,560,100	10,352,400	18,116,700
Barley	3,180,300	3,485,900	4,269,000
Oats	12,354,800	12,167,500	10,486,900
Rye	433,400	620,300	1,081,400
Malt			505,000
Beef, bbls	86,300	70,700	9,851
Pork	281,700	58,400	15,109
Bacon, lbs	3,701,900	579,600	1,273,100
Butter	5,168,900	1,327,800	1,309,900
Lard	20,733,600	2,604,800	1,999,000
Cheese	9,614,000	4,398,600	16,671,200
Wool	429,200	1,225,100	635,500

PORK PACKING AT THE WEST .- The Cincinnati Price Current, of Dec. 13th, states that it has received advices from reliable par-ties in all the Western States, and they agree that the farmers had not commenced moving their hogs to market, the current rates having fallen so far below their expectations. They suppose the decline to be the result of a combination among pork packers, and are unwilling to sell at these prices. Probably a considerable amount of pork will be packed by farmers themselves this season, owing to this belief.

The receipts of hogs at Cincinnati during the week until Monday were small, but there was a marked increase toward the close from this State and Indiana. From Kentucky the receipts were also fair. The hogs arriving are very heavy and unusually lat. The yield of lard exceeds anything before known, in some cases as high

as 50 lbs. per hog.

The receipts at Cincinnati during the week, the season, and com-

paracito	tor boine provides occasons, were as rone in .	
Tota	for the week	23,942
Previous	reported	113,783
Total	for the season	127,675
	in 1864	240,578
es	in 1863	280,046
61	in 1862	386,953
88	in 1861	213.881

The market has been very dull for both the hog and its product during the week, and prices are rather lower, and to a great extent nominal. The decline in hogs has been quite large, and notwithstanding this there was but little disposition to buy even at the decline. Yesterday they sold at \$8 50 a \$9 gross, the buyer getting the benefit of slaughtering, and the sales were not made to regular packers, but to hog dealers, who are still doing the bulk of the packing. \$9 75 a \$10 net were as near the market rates as could be given.

-The Tribune of Dec. 13th says :

"The receipts and shipments for the last twenty-four hours, com-ared with the receipts and shipments of the same period in 1864, were

	Receipts		-Shipments-	
Sunday and Monday	1865. 990	1864. 16,730	1865.	1864.
Tues	1,375	10,135	1,060 1,281	307 2,268
			-	
Total	2,365	26,915	2,291	2,515

The reported sales to-day foot up 2,000 head, ranging in price from \$8 75 to \$10. Of the 3,500 head which arrived at the various yards, nearly 2,000 remained unsold at sunset. The only operators of note were shippers, though city butchers took some lots, and one or two packers bought choice heavy hogs."

LONDON.—Baring's circular of Friday, Dec. 1st, quotes: Our Colonial and Foreign Produce markets have been steady during the week, with a fair amount of business. Sugar quiet. Cotton dearer Money in good demand.

Money in good demand.

Spritzer sseady at £22 5s@£22 10s.

Cool—17 lots Jamaica brought 50s 6d for small red, 191 bags Trinidad were bought in at 66s@£100s, 200 bags Grenada partly sold at 64s @70s, 70 bags Surinum at 66s. Of 200 bags Cuba the sound were bought in at 60s@100s.

Copper in small supply, and prices are firmly sustained.

Copper—Prices are still irregular, but there is more demand for Foreign; Chili Slab £96 10s@£97. Tough Cake and Tile £116, best Selected £119, Sheathing £121. Yellow Metal Sheathing 104d per lb.

Hemp—In Manila nothing to report, but holders firm. Russian, 290 tons St. Petersburg Clean at public sale, all faults, sold at £32@£33.

JUTE quiet, and of 6,100 bales offered barely one-half sold at a decline of 10s per ton, viz. from £16@£22 10s for common to fair, and from £13@£15 for rejections and inferior. 2,400 bales cuttings £7 10.

Iron—Welsh firm; Rail and Bars £7@£7. 10s f. o. b. in Wales. Scotch Pigs 58s 6d for mixed Nos. on Clyde.

Scotch Pigs 58s 6d for mixed Nos. on Clyde.

Scotch Pigs 58s 6d for mixed Nos. on Clyde.

LINSEED—Import for the week 21,604 qrs from the East Indies. The
market continues firm, and Calcutta on spot commands 67s@57s 6d,
Mirzapore and Patna 69s, and Bombay 70s. For arrival a fair business
at 67s up to 68s for Calcutta, and 76s 6d for Bombay; four cargoes
Black Sea on the coast sold at 65s@65s 6d, and several cargoes, on passage and for shipment, at 66s@65s 6d.

Imports since 1st January
488.981 or a garainst 468.856 ors last very. 488,281 qrs against 464,856 qrs last year.

Linszed Cares—The advance is fully maintained. New York in barrels £10, 10s@£10, 15s.

NAVAL STORES—The demand for Spirits Turpentine is large at 46s 6d @47s on the spot, and 47s to arrive. Petroleum is again dearer, and 3s 9d paid for Pennsylvanian.

RICE very dull—Some fine white Bengal sold at 16s.

OILS—Fish: Sperm quiet at £117 for American, and £118 for Colonial; pale Southern £48. 10s@£49; £51 has been paid for Seal, and £54@£55 for Cod. Linseed steady with buyers on the spot at 38s 6d.

RUM steady—150 puns Berbice sold at 1s 7½, and 150 puns Jamaica at 3s 9d for good.

SALTEFIEE in limited downed.

SALTPETEE in limited demand—560 bags Bengal sold at 25s for 4 and 3 per cent, also 173 cases 484 bags Kurrache at 18s@19 for 51\frac{3}{2} to 48\frac{1}{2} per cent, 20s for 37\frac{3}{2} to 36\frac{3}{2}, 23s@23s 6d for 12\frac{1}{2} to 9\frac{1}{2}, and 24s for 4\frac{1}{2}

per cent refraction. per cent refraction.

Spices—Pepper: Black; 1,500 bags Singapore partly sold at \$\frac{4}{3}\text{d}\$; 800 bags Penang realised \$\frac{1}{3}\text{d}\$\frac{3}{4}\text{d}\$. 20 cases nutmegs were chiefly bought in at 2s for mid (86 to the lb.) 10 cases mid red mace were withdrawn at 1s 6d. 350 bags Pimento sold at 3d 320 bags Zanzibar cloves found buyers from \$\frac{1}{3}\text{d}(\text{d})\frac{2}{4}\text{d}\$; 10 cases Penang were held for 1s 3d. 180 cases Carsia Lignea were bought in from 105s@105s for mid to fine bold. 90 bales Ceylon cinnamon were bought in from 2s 2d@2s 6d

for firsts.

for firsts.

SUGAR—The market is quiet at barely last week's prices.

LEAD firm at £21 5s@£21 10s for common pig.

TEA market steady at about previous prices. Oolongs out of recent arrivals command full rates. For green teas former prices barely supported. Good common Congou 1s 1d@1s 1gd per lb.

TIN—Prices of English advanced 2s per cwt; blocks 102s, bars 103s, refined 105s. Straits 96s@97s, cash.

LIVERPOCL.-We have the subjoined report, by the Java, with dates to Dec. 2.

BEEF—The high price of New checks business, and is in favor of Old. Prime Mess 308@85s.

PORK—Irish is plentiful and cheaper. Prime Mess 75s@90s.

BACON—2s per cwt lower, with a very small inquiry. Danish Cumberland Cut is selling on the East Coast at 50s@56s as in quality. Ham scarcely asked for, and nominal at about 65s.

CHESSE-Extra fine Factories are dearer, but secondary qualities can terms. Middling to fine 40s@66s

BUTTER-Dull.

BUTTER—Dull.

TALLOW—The demand has been extremely limited, and prices of all descriptions are lower. In London P. Y. C. has declined fully 1s 6d per cwt. The closing quotations are, for delivery, in all this month, 48s 6d to 49s and Spring 49s 3d to 49s 6d.

PETROLEUM—To complete contracts for delivery in November 3s 3d to 3s 8d has been paid for Refined Pennsylvanian, but to arrive, 3,500 barrels sold at 3s 1d, Spirits are retailed at 1s 10d to 2s.

CHINA.—The following table shows the exports of Teas to the United States for three months ending Sept. 30, being the first of

COTTON.

The market has been subject to the usual variety of contending influences. To support prices we have had more movement, partly speculative, in Cotton goods, a speculative feeling in the raw material and favorable foreign news by the Java leading to a slight export demand. On the contrary, to depress prices, we have had continued heavy receipts at this market, as well as at the Southern ports, scarcity of freight room to Europe, and, most potent of all, the advance in the rate of assurance to five per cent. The severe losses by fire in our cotton warehouses have compelled an advance of premium in self-protection. Probably, the improved prospects of the next planting season (American energy and tact overcoming the formidable difficulties that were presenting themselves) were not without a depressing influence.

The receipts of cotton at this market for eight days ending last evening (Thursday) were as follows:

Bales.	From	Bales
4,184	South Carolina	1,225

Dec. 2d.—Cotton is still coming in freely, and the stations along the lines of the railroads are		

much of which has been waiting for its turn of shipment. Market very dull—unsettled. Middlings 29@30 gold. Exchange: New York sight, par to 1 per cent discount; sterling exchange 145@155. Specie is dull at 148@149 for gold, and 144@145 for silver. Freights 1½@1\frac{3}{2} pence to Liverpool; 1\frac{3}{2}c to New York.

LIVERPOOL.—By the steamship Java we have the Liverpool circular of December 1. We quote:

The market has continued animated throughout the week, and prices have daily advanced, until at the close quotations of American are raised 4d.ald. per lb., the general market being also dearer. This recovery in prices has been brought about by the growing impression that the supplies in the Southern States are much less than have hitherto been supposed, the prevailing opinions now being that at the close of the war there were only about 1½ millions merchantable bales cotton, and that the present crop will only reach about 400,000 bales. In Manchester business has also improved, though many goods and yarn buyara are still time also incompared.

A report to the evening of the 2d says the sales for two days were 35,000 bales, of which 20,000 bales on Saturday, the 2d, including 7,000 bales for export, at a further partial advance of \(\frac{1}{4}\)d, the market closing firm and buoyant.

BREADSTUFFS.

The market has been irregular. Until Wednesday, trade was very dull and the tendency strongly downward. The news by the City of Boston and the Java, and the advance in gold, which set in simultaneously, have changed the whole aspect of the market. There has been a speculative movement at the West, and a large proportion of the stocks in this market have been withdrawn from sale. The business at the steadily advancing prices since Wednesday has been but moderate, but a large export demand prevails at the prices current early in the week.

Flour continues to come forward freely by rail, but there has been a recovery in prices of 25 to 50 cents per bbl. for the regular brands. Those less known, such as low and medium extra Western have improved little. The demand is good, both for export and home consumption. The export demand is quite general, embracing the West Indies and Brazil, as well as the Liverpool mar-

^{*} Say, stock at Memphis (35,000), Nashville (5,000), receipts at St. Louis, Louisville, Cincianati and deliveries to spinners at Bultimore, Philadelphia, Boston and throughout the West.

ket, while the common extra Westerns are taken for the Southern States. A decline in the receipts is predicted soon; although rates of freight over the railways leading to the West, are now much below the average.

Wheat has improved within the past two days from seven to fifteen cents per bushel. The greater improvement is in the low grades of spring, which have been most depressed. They are taken for export to Great Britain. In the finer grades of Red the advance is nearly nominal, as there is only a limited milling demand for them, and choice Springs do not bring their relative value. A decline in freight has favored the export movement. The deliveries at this market are now suspended for the season. They may be resumed to a limited extent by rail and the southern steamers. The wheat market may be said to be in some danger from the excess of flour, and sales at such low prices as will compel our local millers to stop grinding. Some of them have already done so, in which case, the present considerable stock-say about four million bushels-could only find a market through exportation.

Corn has moved freely for export, and with a decline in freights prices have advanced one cent. The receipts of Western corn have now ceased, and but very small quantities of corn grown on the Atlantic coast is reaching the market. The stock, however, is large. Oats have improved. Rye declined 10a15c per bushel, when that pressing upon the market was cleared off and there is now a better feeling. Barley and Barley Malt are doing better, and Peas are firm.

The following are the closing quotations, showing some advance on last week .

on last week:						1

The menhod	han wad		shann ana	mlatina	admonac	alogina

market has undergone a sharp speculative advance, closing unsettled.

-A material falling off in receipts of wheat during the past week, at this point, will be noted by reference to our table

below. Deliveries, however, continue fair, averaging fully 55,000 bushels per day, against 10,000 the corresponding week last and the stock in store now is not far from 800,000 bushels, while the quality of the wheat now received continues fully up to the standard of previous seasons.

DAILY RECEIPTS OF WHEAT BY BAIL FOR WEEK.

	1865.	1864.
Monday	57,510	23,048
Tuesday	77,571	13,653
Wednesday	68,533	14.047
Thursday	(holi	day.)
Friday	71,610	9.503
Saturday	60,195	2,430
		-

Total, one week..... 335,419 Since the Java's news transpired, No. 1 wheat has advanced 10 a 12c per bushel, closing to-day, (15th Dec.,) at \$1 35—the movement mainly speculative.

LIVERPOOL.—We have mail dates to Dec. 2, which report that the corn trade has been firmer in tone, and although the business has not been large during the week, prices are steadier. At our market to-day wheat recovered 1d a 2d per cental. Indian corn 6d dearer with good demand. Flour more firmly held.

THE DRY GOODS TRADE.

The improved tone noticed in the dry goods market last week has assumed a steady firmness and an increased activity. The long period of inactivity waiting for lower prices cleared the country of goods, and as soon as prices touched bottom a fresh demand sprung up, and the consequence is, that goods are not only very firm at previous quotations, but have advanced one to three cents per yard on many styles. At the close of last week prices softened a little, and standards were sold at 31 a 311 cents, but the market has recovered fully, and standard browns are firm at 32. The firmness in the cotton market may have had some effect, but the small stock of goods in the interior is the principal cause of the renewed activity. Already agents are talking of rapid advances in prices, and it will not be strange to see goods again very high, and the operations of the past few weeks enacted over again. A little timely caution may keep a steady remunerative trade all winter, but it seems of little use to caution even those most interested.

Brown Sheetings and Shirtings are quite active in first hands, and a large amount of goods has been sold during the week, causing an increased firmness and slight advance from the nett prices of last week. Standards are very firm at 32 cents. Amoskeag A, Stark A, Lawrence C, Indian Head A, Appleton A, and Amory are held at 32. Indian Head B are 27, do. E 48 inch 45, Nashua extra A 36 inch 30, do. fine C 40 inch 30, Wachusetts sheetings 314. Indian Orchard W is quoted at 25, one cent higher, do. B B 33 inch 26, do. C 37 inch 27, do. N 36 inch 28, and A 40 inch 29. Massachusetts A 4 4 sell at 281, do. B 4-4 271, Medford 31, New Market 33 inch 25, and 36 inch 271. Atlantic A 37 inch sells at 32, P A and A H 37 inch at 311, do. heavy shirtings A V 30 inch 27, do. A G 26, do. fine sheetings A L 361 inch 26, and P L 361 inch 26, do. shirting P E 33 inch 24, do. D 28, and E 24.

BLEACHED SHEETINGS AND SHIRTINGS are steady and moderately active and firm. Prices vary but little from last week on the best grades, while less desirable ones are 1 a 21c higher. New York Mills is held at 45, the same as at the close of last week, Waltham K 92 inch sells at 60c, 21c higher than last week, Amoskeag A 37 inch 37c, Bartlett Steam Mills 33 inch 31c, do 5-4 374c, do 7-8 284, do 44 331c, Newmarket 36 inch 31c, Kent, River 16c, Uxbridge imperial 4-4 321c, White Rock 36 inch 371c, Canoe 27 inch 184c.

Corset Jeans are steady at the concessions of last week. Newmarket colored sell at 311c, and Indian Orchard 321c. •

COTTON FLANNELS are very dull, and sales could not be made to any extent even at a reduced figure. Columbia is named at 271c, a reduction of 21c from last week. Mount Vernon 26c, 4c off from last week, Nashua A 30c, 2c reduction, Manchester brown 32c, 4c. less, and Falls 27tc, 2tc off.

PRINT CLOTHS are more steady, but not active. Prices range at 17 a 174c for 64x64. The sales at Providence for the week were 39,000 pieces, at 17c for 64x64 on hand, and 161 for future de-

PRINTS are firm and more active, especially for dark colors, and most makes are 1 a 1c higher. Garners are held at 27c, Amoskeag pink 26c, do purple 25c, dark 24c, light 25c, Mourning 231. Swiss Ruby 25c, Duchess B 22c, Lowell dark 224c, do light 234c, Wamsutta 21c, do light 22c, Empire 18c, Merimack W 26c, D 25c, Columbia full Madders 21, Glen Cove full Madders 19c, Wauregan fancies 23c. do Rubies 24c, do pinks and purples 24c, American Madder 25c, Spragues Nationals 241c, do purples 33c, Madders, rubies and solid colors 251c, blue and white and shirting 251c, blue and orange 271c.

GINGHAMS are very quiet even at low figures. Louisiana plaids 34c, Lancaster 27c, Glasgow 26c.

STRIPES AND TICKS are more active, and there seems an established tone to the market. Amoskeag A C A ticks 32 inch are held at 80c, the same as last week, Albany 22c, Pittsfield 22c, Willow Brook 36 inch 271, do 32 inch 221c, Atlantic 36 inch 60c, do 7-8 45c, Chattanooga 26c, Passaic 7-8 32c, Peabody 33c, Sacondale 20c, and Henry Clay 30, American stripes 3-3 are sold at 27c, do 6-3 28c, Amoskeag 3 3 50c.

DENIMS are in better demand, and prices are a little firmer. Amoskeags were sold at 55, and Manchester 40.

Drills are not so active and hardly as firm. Amoskeag brown are offered at 32, Stark 30, Globe Steam Mills 274.

CAMBRICS are firmer and better prices are obtained. Saratoga sell at 20, Milton Mills 21, Harmony brown thin shades 21, Fancy brand 18.

Mouslin Delaines are more active and firmer; though there has been but slight advance in prices. Hamilton and Manchester are sold at 30c., Manchester all wool 521.

LINSEYS are in some demand, but rather irregular. White Rock are sold at 40, Irwin & Stenson's at 45.

CLOTHS are dull and sales are nominal for immediate use. Cotton warps are held at \$2 25 for No. 1, \$2 15 for No. 2, and \$2 05 for No. 3. Utica all wool beavers \$3 50 for light weight, and \$3 75 for heavy. Glenham Co. C. W. Tricuts \$1 75, Union Blacks \$2 a \$2 50.

Cassimeres are quiet and irregular. Spring styles are not yet fully in market. Broadbrook all wool fancies range from \$1.75 a \$2.25, Millville \$2.25 a \$3 for all wool, and \$2.25 a \$2.75 for silk mixtures. Merchants' Woollen Co. do. are held at \$2.50 for 3-4 and \$5 for 6-4; Rochester grey \$1.40; Dighton's cassimere \$2.50 for plain; Suffolk Mills do. \$1 50 a \$2 25 for \$\frac{4}{2}\$ and \$4 75 a\$5 25 for 6.40; plough, loom and anvil do. 67\$\frac{1}{2}\$.

Flannels and Blankets are very quiet and confined to imme-

mediate use.

CARPETS are steady, and with light stocks prices are firm. The Lowell Co.'s Ingrain sell at \$1 60 for superfine, \$1 75 for extra superfine, and £2 15 for imperial three-ply; the Hartford Co.'s \$1 60 for medium superfine, \$1 75 for superfine, \$2 07½ for imperial three-ply, and \$2 24 for extra three-ply; Brussells \$3 45 for 8 fr.,

\$2 55 for 4 fr., and \$2 65 for 5 fr.

Linen Goods are steady and prices without change. Linen crash brings \$16 a \$21, and Huckabuck 25 for bleached and 23 for un-

B

9.

ly st

m

31,

ge ch Hoop Skirts are in steady demand and are sold at good prices. Bradley's Duplex Elliptic 20 to 50 Hoops 87 c. a \$1 05; Empress trail \$1 25, S. T. & A. T. Meyers IXL 11 inch 55c. a 80c., 3 inch 70c. a \$1 10.

FOREIGN GOODS are still very quiet, though there will necessarily be sympathy with the increased domestic trade. The auction sales have been less animated, and most kinds of goods have sold low.

IMPORTATIONS OF DRY GOODS AT THE PORT OF NEW YORK.

The importations of dry goods at this port for the week ending Dec. 14, 1865, and the corresponding weeks of 1863 and 1864, have been as follows :

The Railway Monitor.

READING DIVIDEND.—This company have declared a dividend of 10 per cent on their preferred and common stock, clear of National and State taxes, payable on and after December 30, in cash, or common stock at par, at the option of the holders. Transfer books are closed this day (16th), to be re-opened January 9, 1866.

LA CROSSE AND MILWAUKEE RAILROAD.—This railroad and premises, which are mortgaged to secure the payment of the second mortgage bonds, are advertised to be sold on the 4th of January next. A committee, on the part of the Milwaukee and St. Paul Railroad Company, have been appointed to purchase said property, and have already received nearly a million of the bonds for this purpose. Bondholders who deposit their bonds with the committee on or before Dec. 25, will participate in the advantages of the purchase. Those who do not will only be entitled to a dividend from the purchase money. The bonds will be received at the office of the Milwaukee and St. Paul Company, No. 25 William street.

PITTSBURG, FORT WAYNE AND CHICAGO RAILROAD.—The Pittsburg, Fort Wayne and Chicago Railroad Company have made a contract for twenty-five new engines, to cost between \$500,000 and \$600,000. The company has, during the year, made large expenditures for construction, and has sold stock, it is stated, to the extent of a million and a quarter dollars.

New York Central Railroad.—The report of the New York Central Railroad for the year ending September 30, 1865, was presented to the general meeting of shareholders at Albany, on the 13th instant. We shall give in the Chronicle, for next week, an analysis of the reports of this company since its organization. The following comparative figures for the years 1864 and 1865 exhibit the condition of the company at the close of those years;

Stock, beginning of the year	Sept. 30, 1865. \$24,386,000 205,000	Sept. 30, 1864. \$24,209,000 177,000
Total capital	24,591,000 14,627,442	24,386,000 13,211,341
Total stock and debt	39,218,442 3,921,297	37,597,341 3,854,867
Total cost represented	43,139,739	41,452,208
Cost of construction and equipment. Consolidation premiums Lake and lake shore property Hudson bridge property. Cash and bills, surplus. Fuel and material, operating.	33,701,919 6,768,119 841,791 438,000 *216,277 2,173,633	32,879,251 6,995,597 604,450 108,495 *372,659 1,491,756
Total value of property. Less, fuel charged off	44.139,739 1,000,000	42,452,208 1,000,000
Total reckoned value	\$43,139,739	\$41,452,208
* Cash and bills on hand Expenses and interest accrued	Sept. 30, 1865. \$1,152,033 935,757	Sept. 30, 1864. \$1,196,449 823,790
Surplus cash, etc	\$216,276	\$372,639

The traffic of the road for the two years netted as follows:

	Sept. 30, 1865.	Sept. 30, 1864.
From passengers. Freight. Miscellaneous.	\$4,521,454 8,776,027 678, 04 3	\$3,923,152 8,543,371 531,367

PACIFIC MAIL STEAMSHIP COMP THROUGH LINE	PANY	'8
TO CALIFORN TOUCHING AT MEXICAN PORT		A,
AND		

CARRYING THE U. S. MAIL,

LEAVE PIER NO. 42 NORTH RIVER, FOOT of Canal street, at 12 o'clock noon, on the 1st, 11th 21st of every month (except when those dates fall on Sunday, and then on the preceding Saturday), for ASPINWALL, connecting, via Panama Railroad, with one of the Company's steamships from Panama for SAN FRANCISCO, touching at ACA-PULCO.

ISL-HENRY CHAUNCEY, Captain Gray, connecting with CONSTITUTION, Capt. Farnsworth.

11th-ATLANTIC, Capt. Maury, connecting with GOLDEN CITY, Capt. Bradbury. 21st-NEW YORK, Capt. Horner, connecting with COLORADO, Capt. Watkins.

Departures of 1st and 21st connect at Panama with steamers for South Pacific ports. Those of 1st touch at Manzanillo.

Through Passage Rates, in Currency. First Cabin. Second Cabin. Steerage, \$350 \$250 \$126

A discount of one-fourth from steamers'rates allow-ed to second cabin and steerage passengers with families.

ed to second capin and steerage passengers with imilies.

One Hundred Pounds Baggage allowed each adult. Baggage masters accompany baggage through, and attend to ladies and children without male protectors. Baggage received on the dock the day before sailing from steamboats, railroads and passengers who prefer to send down early.

An experienced Surgeon on board. Medicines and attendance free.

A steamer will be placed on the line January 1st, 1896, to run from New Orleans to Aspinwall, via Havana.

vana.

CRUSHERS AND PULVERIZERS. FOR WET OR DRY WORKING,

The Best and Cheapest in the World.

The Best and Cheapest in the World.

MANUFACIURED BY THE

Boston Milling and Manufacturing
Company,

105 State Sreet, Boston, Mass.

Miners should not purchase machinery before selng, or sending their friends to examine, the practical working of this series of machinery.

1.37 The Whirling Table, or Crusher, weighs less than two tons, and crushes from ten to twelve tons of ore per hour to fine gravel, or two hundred and fifty tons in twenty-four hours.

The Pulverizer weighs two tons, and pulverizes to dust infinitely finer than stamp work, thirty-four hundred lbs per hour, or thirty sky tons per diem, equal to the yield of forty stamps; and the first cost and wear, as compared to this number of stamps, is about one-tenth—the entire yield being fit for analgamation without further reduction. The fine dust is not obtained by screening, but by the immediate action of the Pulverizer.

Fifteen horse-power, net, is the maximum power required for one machine.

The cost of wear per ton is less than by sny other machine. All wearing parts are now made of Franklinite iron.

Let miners and their friends carefully study the practical working of all other machines and processes offerical working of all other machines and processes offer-

The cost of wear per on its less than 10 y my other machine. All wearing parts are now made of Frank-linite iron.

Let miners and their friends carefully study the practical working of all other machines and processes effect, and then see ours working in East Boston, Mass. We ask only this.

All our machines are now made in our own shop. No CONTRACT WORK.

THE MANHATTAN LIFE INSUR-ANCE COMPANY

NOS. 156 AND 158 BROADWAY.

From the great success of this Company, they are enabled to offer superior advantages to policy-holders. Life-policies are issued, payable in annual, or in one, five, or ten annual, installments; also, non-forfeiture endowment policies, payable in ten annual payments, which are paid at death, or on arriving at any particular age. Life insurance, as an investment, has no superior, as it has saved millions of dollars to the insured, and thousands of families from ruin. Dividends are paid to policy-holders, thus enabling them to continue their policies, if otherwise unable to do so.

them to do to do so.

This favorable feature has been the means of saving many policies that would have been forfeited for want of means to continue them, and, in several instances, families, once wealthy, have thus been saved

Fire, Burglar, and Damp-proof Safes,

AND POWDER AND BURGLAR-PROOF LOCKS. AND POWDER AND BURGLAR-PROOF LOCKS.

The reputation that the Alum Patent Safes have enjoyed for many years of perfect impenetrability by fire, entire freedom from dampness (the great evil of every other safe) commends them to the attention of all persons requiring protection from fire and burglars. These safes are the only ones constructed of heavy angle iron and corner braces, which cannot be cut through. Bankers and jewelers requiring fire or burglar proof depositories, or both combined, are invited to examine the specimens at our factory, where they can readily satisfy themselves of their superiority.
